Plant, Soil, and Nutrition Laboratory Many thoughtful persons have come to believe that substandard diets are contributing causes to a large proportion of the ailments and diseases common to mankind. Some overenthusiastic individuals even believe that improving the diet will eliminate one or all of the health problems involved. Some claim that we eat too much, some that we don't get enough vitamins, and others that we raise our crops on soil not properly fertilized. Certain groups want us to use only organic fertilizers on our soils, while others advocate particular mineral fertilizers, and so on.
