Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Environment, Vegetation, and Regeneration After Timber Harvest in the Applegate Area of Southwestern Oregon We subjected all of the quantitative environmental variables to two stepwise multiple regression analyses - one with stocking percent as the dependent variable and the other with number of seedlings per acre as the dependent variable. Environmental variables with significant coefficients were retained in the resulting multiple regression equations. The equations accounting for the most variation are presented here as mathematical models for comparing forest sites in terms of regeneration after clearcutting. Topographic variation limited the sample size to less than 30 subplots in several extremely irregular clearcut units. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
