A Short Course in College Mathematics Comprising Thirty-Six Lessons on Algebra, Coordinate Methods, and Plane Trigonometry

By Robert Édouard Moritz

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 46 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 edition. Excerpt: . . . equation of the form $f(x, y) = k - jx, y$ 0, k being any constant, passes through all the intersection points of C_1 and C_2 . 19. What is meant by a linear equation When are two linear equations inconsistent 20. Show how the real roots of every quadratic equation $ax^2 + bx + c = 0$ can be found graphically by means of the unit parabola and some straight line. 21. Show how the real roots of every cubic equation in x can be found graphically by means of the cubical parabola $y = x^3$ and some straight line. 22. Show how the real roots of every quartic equation in x can be found graphically by means of the unit parabola and some circle. 23. When are two sets of simultaneous equations said to be equivalent Interpret this condition graphically. 24. Is the graphic method of solving equations of any practical...

Reviews

Very useful to all of category of people. I actually have read through and that i am sure that i will likely to go through once more again in the foreseeable future. I realized this book from my i and dad advised this publication to find out.

-- **Alta Kirlin**

This is the very best publication i have got read until now. It is definitely simplified but shocks within the fifty percent of the pdf. You may like how the article writer create this pdf.
