.conversation that we cannot keep it to mean congruent ; but our language will not permit it, and we are forced to use the newer word. Whenever it can be used without misunderstanding, however, it should be retained, as in the case of equal straight lines, equal angles, and equal arcs of the same circle. The mathematical and educational world will never consent to use congruent straight lines, or congruent angles, for the reason that the terms are unnecessarily long, no misunderstanding being possible when equal is used. The word equivalent was introduced by Legendre at the close of the eighteenth century to indicate equality of length, or of area, or of volume. Euclid had said, Parallelograms which are on the same base and in the same parallels are equal to one another, while Legendre and his followers would modify the wording somewhat and introduce...
