

Transactions of the Kansas Academy of Science Volume 29

By Kansas Academy of Science

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 96 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 edition. Excerpt: . . . chicks pursuing flies while the old birds were preening their feathers. In the shade of the poultry house flies were crawling over the floor and feeding upon feces, which contained tapeworm embryos. From fowls in the United States six different species of cestodes have been collected. Of these, *Davainea proglottina*, (*Davaine*), rare in this country, may be transmitted by a slug (*Limax cinereus*). Another, *Choanotsenia infundibuliformis* (*Goeze*), may be transmitted by the house fly, *Musca domestica*. The means of transmitting any of the remaining four species was not known until the past summer, when an experiment demonstrated that the housefly may transmit to fowls another of these cestodes, which appears to be *Davainea cesticillus* (*Molin, 1858*), *Blanchard, 1891*. The fowls used in the experiment were hatched in an incubator and placed at once in a fly-proof field cage, where they were given food free...

Reviews

It is a single of my personal favorite ebook. Better than never, though I am quite late in starting reading this one. I am effortlessly will get a satisfaction of reading a published ebook.

-- *Ms. Lavada Krajcik*

Comprehensive guideline for book lovers. It can be filled with knowledge and wisdom I realized this publication from my dad and I suggested this pdf to find out.
