The impact of waste dump in Uwguaji Enugu Metropolis

By Matthias Okoro

GRIN Verlag GmbH Okt 2014, 2014. Taschenbuch. Book Condition: Neu. 213x146x6 mm. Neuware - Seminar paper from the year 2012 in the subject Environmental Sciences, grade: A, University of Nigeria (CENTER FOR ENVIRONMENTAL MANAGEMENT AND CONTROL), course: ENVIRONMENTAL MANAGEMENT AND CONTROL, language: English, comment: People living near polluted land have higher incidences of migraines, nausea, fatigue, miscarriage and skin disorders and other forms of pathogenic diseases. Long-term effects of pollution include cancer, leukemia, reproductive disorders, kidney and liver damage, as well as central nervous system failure. Children often suffer from developmental problems and weakened immune systems. In addition to direct health effects, soil pollution also harms plants that feed on heavy metals. , abstract: Soil and water are vital for our life, health and over-all well-being. But the waste generated from human activities can be hazardous, toxic and even lethal to these two substances because of the high potential it has to contaminate them. The hazardous and toxic parts of waste from different types of human establishments comprising infectious, bio-medical and radio-active material constitute a grave risk, if these are allowed to get mixed with soil and water when it is not properly disposed. Its propensity to encourage growth of...
