

Viral Sex: The Nature of AIDS

By Jaap Goudsmit

Oxford University Press. Paperback. Condition: New. 288 pages. Dimensions: 8.0in. x 5.4in. x 0.6in. The current worldwide AIDS crisis is about 20 years old, but the disease itself is much older. In fact, AIDS is only the latest chapter in the evolution of the complex retrovirus we call HIV. Where was HIV lurking before it emerged in the early 1980s? There is some evidence that the Western strain of HIV arose in Europe as early as 1939. There is even more evidence that HIV is a direct descendant of a virus which has long infected certain African apes and monkeys, a virus called SIV--simian immunodeficiency virus. But why is a virus that is harmless in monkeys so lethal in human beings? And why, after millennia of contact between African monkeys and humans, is SIV only now entering the human population in plague proportions? In *Viral Sex*, leading AIDS researcher Jaap Goudsmit illuminates the origins and nature of the world's most lethal disease. He provides an eyewitness account of science's effort to understand and control the spread of this deadly virus, in a fascinating journey that reaches from the deepest recesses of the African rainforest, to ancient Egypt and the mummified remains...
