This item is printed on demand - Print on Demand Neuware - Research Paper from the year 2014 in the subject Business economics - Supply, Production, Logistics, , language: English, abstract: However challenging it may be in carrying out this research, its findings are expected to give a contribution towards role-based ERP system implementation practice. This study's findings are expected to be significant to various interested parties, for example vendors may understand price- and design-based problems facing target customers and simplify applications to assist companies to implement role-based ERP systems with ease. On the other hand, people or companies implementing role-based ERP systems can also realize the internal and extraneous needs and get prepared effectively. The trouble in implementing role-based ERP systems in industrialized nations may be worsened by the assertion that role-based ERP embodies proved ways of doing business thus requiring companies adopting role-based ERP systems to adjust their corporate processes to comply with business practices constitutional in role-based ERP packages. Venders contend that the implementation of such best practices lowers the cost of configuring the software and results in improving the company's processes. Therefore, Gosain, S. (2004)...
