To read **The Theory and Practice of Finding the Longitude at Sea or Land Volume 1; To Which Are Added, Various Methods of Determining the Latitude of a Place**, eBook, remember to refer to the link under and download the document or get access to additional information that are in conjunction with THE THEORY AND PRACTICE OF FINDING THE LONGITUDE AT SEA OR LAND VOLUME 1; TO WHICH ARE ADDED, VARIOUS METHODS OF DETERMINING THE LATITUDE OF A PLACE, ebook.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1809 Excerpt: .24 1 3 = lh. 36 4 Apparent right ascension of Vega, -18 30 31 Remarks. I. If the right ascensions are equal, the vertical will be the meridian; and hence the apparent time is easily found, by subtracting the Sun s right ascension from that of the star, and applying the equations as formerly. II. If the stars be observed on the same vertical at different times, the difference between the observed interval reduced to sidereal time, and the difference of right ascension, is to be used in place of this last quantity. Problem XIV. Given the Interval of Time between the Rising of two known fixed Stars, to find the Apparent Time of either Observation. Rule. Reduce the observed interval to sidereal time, which may be done with sufficient accuracy, by adding to the interval in mean solar time, the the proportional part answering to 24 hours, the above interval, and 3 56, which is the mean daily increase of the Sun s right ascension; and let the difference between the reduced interval, and the difference of the right ascensions of the stars, be called arch first. Now, to the log. co secant of arch first, add the log. co-tangent of the declination of the first observed star, and the log. tangent of the declination of the other star; The sum will be the log. of a natural number, the sum or difference of which, and the natural co-tangent of arch first,...
