

Engineering Drawing Practices Volume I of II Aerospace and Ground Support Equipment (Paperback)

By National Aeronautics Space Administration

Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.This handbook is published by the National Aeronautics and Space Administration (NASA) as a guidance document that provides engineering information; lessons learned; possible options to address technical issues; classification of similar items, materials or processes; interpretative direction and techniques; and any other type of guidance information that may help the Government or its contractors in the design, construction, selection, management, support, or operation of systems, products, processes, or services. This handbook is approved for use by NASA Headquarters and NASA Centers, including Component Facilities. This handbook provides design guidance for high-voltage space power systems (>55 volts) that must operate in the plasma environment associated with Low Earth Orbit (LEO). Requests for information, corrections, or additions to this handbook should be submitted via Feedback in the NASA Technical Standards System at [//standards.nasa.gov](https://standards.nasa.gov).

Reviews

A top quality publication along with the font used was intriguing to read. I really could comprehend everything using this written e book. Its been designed in an remarkably straightforward way and it is only after i finished reading through this publication by which basically altered me, modify the way i believe.

-- Cathrine Larkin Sr.

Very useful to all of group of people. I actually have read through and so i am certain that i will planning to study yet again once again down the road. I am just very easily can get a satisfaction of looking at a created book.

-- Mark Bernier
