The present monograph is, nevertheless, more than a mere excerpt from the above publication, since its scope has been considerably extended so as to include other matters having an indirect bearing on, if not actual connection with, the question under discussion. Readers acquainted with my previous efforts will consequently find herein embodied new material which it is hoped will add further interest to the topic indicated by the title. Although this contribution - the first of a uniform series which will be periodically published - is primarily intended for advanced scholars in this special line of study and research work, it has been at the same time written in a simple style with the endeavour of making it also as attractive as possible to the general reader.
