Use OpenView tools to improve network performance, availability, and valuePlanning, installation, customization, security, optimization, scalability, troubleshooting, and more "I would recommend this book to my students." - Emil Velez, Technical Consultant - Education, HP. The comprehensive, authoritative guide to OpenView administration. This is the first comprehensive, hands-on guide to using OpenView administration tools to maximize network performance, availability, and value. You'll find expert guidance on planning, customization, automation, security, optimization, troubleshooting, and a whole lot more. After a practical review of network management and SNMP, three HP consultants walk you through using Network Node Manager (NNM) to monitor network connectivity - and adapting NNM to your unique requirements. Next, you'll discover how to use Customer Views (CV) containers to manage your most important resources, from customers to Internet sites. The authors offer realistic guidance on managing networks across the Web using HP's Service Information Portal, and on monitoring computers and software with OpenView Operations (OVO). The coverage includes: overcoming obstacles to successful network and system management; planning for deployment - a best-practices checklist; running NNM - discovery, symbols, objects, alarms, and queries; customizing NNM - submaps, application integration, custom symbols/fields, and more; and CV - providing a logical view of devices based on customer ownership. It also includes: SIP - making management information Web-accessible, step-by-step; managing data collection and event configuration; scalability and distribution - remote consoles, filters, and Distributed Internet Monitoring; roles, service levels, installation, configuration, agents, policies, and day-to-day administration; taking full advantage of Smart Plug-Ins (SPI); improving flexibility...
