KERBEROS AUTHENTICATION PROTOCOL

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Cryptography and Network Security | Kerberos has two purposes: security and authentication. On most computer systems, a password is used to prove a user's identity; on a distributed network system, like Athena, this password must be transmitted over the network, from the workstation being used, to any other machines containing files or programs the user wants access to. Because this password is the one secret piece of information that identifies a user...
