

Coastal Processes of the Elwha River Delta: Chapter 5 in Coastal Habitats of the Elwha River, Washington: Biological and Physical Patterns and Processes Prior to Dam Removal: Usgs Scientific Investigations Report 2011-5120-5 (Paperback)

Filesize: 1.33 MB

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

COASTAL PROCESSES OF THE ELWHA RIVER DELTA: CHAPTER 5 IN COASTAL HABITATS OF THE ELWHA RIVER, WASHINGTON: BIOLOGICAL AND PHYSICAL PATTERNS AND PROCESSES PRIOR TO DAM REMOVAL: USGS SCIENTIFIC INVESTIGATIONS REPORT 2011-5120-5 (PAPERBACK)

Bibliogov, United States, 2013. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. To understand the effects of increased sediment supply from dam removal on marine habitats around the Elwha River delta, a basic understanding of the region s coastal processes is necessary. This chapter provides a summary of the physical setting of the coast near the Elwha River delta, for the purpose of synthesizing the processes that move and disperse sediment discharged by the river. One fundamental property of this coastal setting is the difference between currents in the surfzone with those in the coastal waters offshore of the surfzone. Surfzone currents are largely dictated by the direction and size of waves, and the waves that attack the Elwha River delta predominantly come from Pacific Ocean swell from the west. This establishes surfzone currents and littoral sediment transport that are eastward along much of the delta. Offshore of the surfzone the currents are largely influenced by tidal circulation and the physical constraint to flow provided by the delta s headland. During both ebbing and flooding tides, the flow separates from the coast at the tip of the delta s headland, and this produces eddies on the downstream side of the headland. Immediately offshore of the Elwha River mouth, this creates a situation in which the coastal currents are directed toward the east much more frequently than toward the west. This suggests that Elwha River sediment will be more likely to move toward the east in the coastal system.
