Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from The Endocrine Organs: An Introduction to the Study of Internal Secretion The time at my disposal for the lectures precluded anything more than a passing mention of some of the many workers who have contributed to our knowledge of this, the newest, development of physiology; and in republishing, it has not been deemed desirable unduly to extend the references to literature, seeing that they are already to be found in such standard works as Biedl's Innere Sekretion, in which the bibliography occupies more than 250 large octavo pages, and Swale Vincent's Internal Secretions and the Ductless Glands, where they run to over 2000 titles. Since the appearance of those works much new matter has been added; and more than one long list of literature has appeared in monographs dealing with special internally secreting organs. It is to publications of a comprehensive character such as these that the scientific worker will turn for detailed information. The aim of this little book is less ambitious: it is designed to supply a concise account of our present knowledge for the benefit of students and practitioners who may be desirous of obtaining more information regarding the internal secretions than is afforded by the ordinary text-books of physiology, but have not the time or opportunity to peruse extensive monographs or consult original articles. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
