From the PREFACE: IN the past few years great advances have been made in cheese making, and for the old rule of thumb, definite scientific reasons have been substituted. During the first three years of the Wisconsin Dairy School, the theoretical part of the instruction in cheese making was given by a series of lectures and quizzes along with the practical work. All books treating on cheese making were either out of date, because of the rapid advance in knowledge on the subject, or were unfitted for use as text books in a school. The instructor has learned by experience that in order to have the students properly grasp the subject before them, they must have a text book for use along with the lectures and quizzes, in short, with the advent of dairy schools, cheese making in pedagogic form was a necessity. There are other cheese makers who are not students in dairy schools and it was hoped that they might also find information in the book that would help them. This was proven to be true by the rapidity with which the first edition was exhausted, and the present edition has been revised with a view to more fully meeting the needs of such persons. Part I deals with the fermentations of milk and the process of making. Part II deals with the construction and operation of factories. Part III consists of questions which are answered in the text of parts I and II. The page on which the answer to the question may be found is indicated at the end of the question. Important Points are indicated by paragraph headings, and usually the answer can...
