RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 32 pages. Original publisher: Washington, D. C. : U. S. General Accounting Office, 2004 OCLC Number: (OCoLC)56122868 Subject: Space shuttles -- Safety appliances -- United States -- Planning. Excerpt: . . . NASA needs to improve its analytic tools to help it improve the basis for Further Improvements in identifying and selecting shuttle upgrades. NASA uses Probabilistic Risk the SLEP Possible Assessment ( PRA ) methodologies, specifically the Quantitative Risk Assessment System, to improve safety by assessing the relative risk reduction of potential upgrade projects to overall shuttle risk. However, program managers are aware that the PRA is incomplete and does not contain certain key attributes that would make it more accurate, reliable, and useful. Early next year, they plan to begin using a revised PRA more oriented toward the shuttle. In addition, the Manager of the Shuttle Program Development Office believes it is important to develop a new Sustainability Health Metric System in order to mitigate the risk that an asset required to fly may not be available. The metric would score a proposed sustainability project after an evaluation of a set of common sustainability factors for all elements of shuttle flight and ground systems and subsystems. Similarly, the CAIB could not find adequate application of a metric that took an integrated systematic view of the entire space shuttle system. NASA is considering development of a sustainability metric, and the Manager of the Shuttle Program Development Office believes that if approved, it could be ready for use during the SLEP Summit in February 2004. NASA expects that the nomination of projects at that meeting will come from a more comprehensive evaluation through extensive use of hard data and rigorous analysis. Although creation of the SLEP may improve...
