Basic C# programming knowledge is assumed. What You Will Learn * Understand the best practices of Serverless architecture * Learn how how to deploy a Text Sentiment Evaluation application in an Azure Serverless environment * Implement security, identity, and access control * Take advantage of the speed of deployment in the cloud * Configure application health monitoring, logging, and alerts * Design your application to ensure cost effectiveness, high availability, and scale In Detail Serverless architecture allows you to build and run applications and services without having to manage the infrastructure. Many companies have started adopting serverless architecture for their applications to save cost and improve scalability. This book will be your companion in designing Serverless architecture for your applications using the runtime, with Microsoft Azure as the cloud service provider. You will begin by understanding the concepts of Serverless architecture, its advantages and disadvantages. You will then set up the Azure environment and build a basic application using a sample text sentiment evaluation function. From here, you will be shown how to run services in a Serverless environment. We will cover the integration with other Azure and 3rd party services such as Azure Service Bus, as well as configuring dependencies on NuGet libraries, among other...
