

Designing Inclusive Interactions

Filesize: 1.33 MB

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.
(Ally Reichel)

DESIGNING INCLUSIVE INTERACTIONS

Springer Feb 2010, 2010. Buch. Book Condition: Neu. 235x155x19 mm. This item is printed on demand - Print on Demand Neuware - Designing Inclusive Interactions responds to the recent changes in the research landscapes in the fields of Human Computer Interaction, Computer Science, and Healthcare as a result of new technology and innovation. Research into accessibility for interface design has always represented an unconventional, multi-disciplinary arena of pragmatic disciplines, such as experimental psychology, engineering design, and rehabilitation practice. It has moved from isolated activities in disparate fields to the more interdisciplinary perspective evident today in areas such as healthcare and inclusive design. As a result of this, there is now a need for the transfer of knowledge and techniques from inclusive design research into the wider community. This book is divided into five areas: Understanding Users for Inclusive Design Measuring Inclusion Inclusive Interaction Assistive Technology Inclusion and Healthcare The papers were selected by reference to the peer assessments of an international panel of reviewers from many key disciplines such as computer science, assistive technology, engineering and product design. This book represents a sample of leading national and international research in the fields of inclusive design, universal access, and assistive and rehabilitative technology. We hope that this will encourage inter-disciplinary research leading to better designs, effectively reducing exclusion and difficulty, in the workplace, at home and at leisure. Designing Inclusive Interactions contains the proceedings of the fifth Cambridge Workshop on Universal Access and Assistive Technology (CWUAAT), incorporating the 8th Cambridge Workshop on Rehabilitation Robotics, held in Cambridge, England, in March 2010. It contains contributions from an international group of leading researchers in the fields of Universal Access and Assistive Technology. Although the book will be divided into four main parts yet to be named, this conference will mainly focus on the...
