

Modern Applied Statistics [Paperback]

Filesize: 1.52 MB

Reviews

This pdf might be well worth a study, and a lot better than other. It really is simplistic but excitement inside the fifty percent in the book. Its been printed in an exceedingly straightforward way which is just after i finished reading this ebook through which really modified me, modify the way i believe.

(Derick Brekke)

MODERN APPLIED STATISTICS [PAPERBACK]**DOWNLOAD**

paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback Pages. Number: 232 Publisher.: Meteorological Press; 1 edition (February 1. 2004). Book succinctly describes the basic statistical theory and methods. focusing on the calculation of specific applications and examples. The book is eight chapters. of which the first chapter describes the basic statistical data; second. III and IV of random variables and their distribution. statistical inference and random sampling; Chapters 5 and 6 focused on the commonly used regression analysis and time series analysis; Chapters 7 and 8 describes the extreme value analysis and decision analysis. This book is the applied disciplines of the undergraduate general materials. but also for the tertiary institutions teaching reference books. The book has more examples. self-help readers. Contents: the first chapter the basic statistics of the data statistically. a few basic concept of Mean. mode and median variance and standard deviation variability and variation coefficient of skewness coefficient and correlation coefficient covariance and correlation coefficient exercises a second The digital characteristics of random variables and their distribution function of random events and the probability of a random variable and its distribution function. multi-dimensional random variables and their distribution of random variables Problem II. Chapter III of the theoretical basis of statistical inference statistical inference sampling distribution of parameter estimates assume that the test Problem 3 random simple random sample of the concept of classification sampling systematic sampling cluster sampling and multi-stage sampling Problem 4. Chapter regression analysis regression of a linear regression of the type of sampling sampling method multiple linear regression the effect of the regression equation nonlinear regression analysis. stepwise regression analysis of exercise five sixth time series analysis of the concept of the time series trend analysis seasonal variation analysis...
