Excerpt from Huntington Beach State Park: Visitors Guide Rice production continued to expand until the Civil War brought an end to slavery, which was the cornerstone of that system. Of all the agricultural enterprises of man, few require the huge investment of labor required by rice cultivation. Swamps were cleared of their heavy growth and dikes were built to hold water in these fields. A complicated system of canals and ood gates was then constructed in order to regulate precisely the water levels at specific times in the growing cycle of the plants. Without the regimented system of labor provided by slavery it was difficult to maintain and operate the vast and complex system. Rice cultivation continued on a diminished scale after the Civil War, but no economic enterprise was to be forthcoming to replace rice. The Neck was to become an area dominated by fishing and small subsistence farms. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
