

Technologic Papers of the Bureau of Standards Volume 11-20

Filesize: 7.11 MB

Reviews

Comprehensive manual for ebook fans. I am quite late in start reading this one, but better then never. Its been written in an exceptionally basic way and is particularly merely soon after i finished reading this publication in which really changed me, affect the way in my opinion.
(Prof. Antone Olson II)

TECHNOLOGIC PAPERS OF THE BUREAU OF STANDARDS VOLUME 11-20

To download **Technologic Papers of the Bureau of Standards Volume 11-20** PDF, you should access the web link listed below and save the document or have accessibility to other information that are have conjunction with TECHNOLOGIC PAPERS OF THE BUREAU OF STANDARDS VOLUME 11-20 book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 Excerpt: .at the same temperature at which it leaves the producer the loss of sensible heat will be zero. It should be possible, therefore, to design a plant so that the use of a poor gas instead of a rich one should make practically no difference in the efficiency of transmission of heat from producer to kiln. It is customary to mix the gas with air just as it enters the kiln, thus producing combustion in direct contact with the stone. The gas is blown in by forced draft, and steam is one of the chief products of combustion. These considerations indicate that in a gas-fired kiln it should be possible to force the flame farther toward the center, the burning zone should be longer, and the calcination temperature should be lower. Consequently, the kiln should have a larger capacity and should produce a better quality of lime. For a large plant the labor cost should be less. There is, however, the danger of recarbonation, which occurs wherever forced draft alone is used. Care must be taken not to blow in the gas and air so fast that the products of combustion will have any tendency to go down into the cooler. Gas producers have one decided advantage over methods of direct firing, as a much cheaper fuel may be used, and while the coal must be low in sulphur to prevent corrosion of the iron, it may be higher in ash and have a lower heating...
