Createspace, United States, 2013. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.In the year 2005, technology was persistent on the verge of exploration with exciting breakthroughs. Although it was Professor Michael Brendan s time to shine, his time was running out. His grant was with the stem cell s Nano-Bot reproduction program. Nana-bot s technology was what many called star trek mumbo-jumbo and a waste of good government money. Funny, have you ever heard of such a thing as bad government money? The Professor produced functioning nana-bots that could be programmed to repair anything needed, but they could not replicate or reproduce at any rate. This was essential for the use in human medicine and for use of the bots in the near future. Three days from the cancellation of his program, Professor Brendan decided to take a day off before the obvious failing of his occupation that he had embarked on nearly ten years before. Approximately an hour from his home, is a place known as Area 51, where an alien spaceship was said to have crashed in the late 50 s. However, we all know there are no certainties of alien existence, but the government appears to be heavily guarded. This leads to the question, Are aliens myth or legend? The Professor used metal detecting and treasure hunting as a way to escape the everyday world. He was given a three day clearance to metal detect Area 51 for the first time ever. His discovery today would lead to advancement in science and medicine more so the next 72 hours, than science has seen in the past 1000 years.
