Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Tree Improvement Research at the Lake City, Florida, Research Center: A Project Analysis Forest genetics at the Lake City, Florida, Research Center is financed jointly by the Florida Board of Forestry and the U. S. Forest Service. Another cooperative agreement with the University of Florida's School of Forestry provides for the exchange of technical information on the project and joint use of facilities. Initially this research program was concentrated on the inheritance of gum production, a field in which the basic relationships have now been determined and one in which this project will continue to provide leadership. Turpentine, however, no longer is the major end product of slash and longleaf pine in this region. Naval stores now is being integrated with other forest use. Therefore, the improvement of growth rate, quality, and resistance to disease and insects must also be considered. It has already been determined that gum yield is correlated with growth rate. Thus, primary emphasis is being given now to improvement of growth and quality, with gum yield as a secondary objective. The Lake City Tree Improvement Project complements correlated research in other southern research centers, i. e. The fundamental south wide studies at the Southern Institute of Forest Genetics, Gulfport, Mississippi; the applied aspects of tree selection and breeding being undertaken cooperatively by the State of Georgia and the Southeastern Forest Experiment Station at Macon and the University of Georgia School of Forestry at Athens, Georgia; the educational and research program in Forest Genetics at the School of Forestry, University of Florida, Gainesville, Florida; the research and educational program in Forest Genetics of the Texas Forest Service, College Station, Texas; and related projects at Crossett,...
