

Applying Group Technology to reduce the setup time of production

Filesize: 5.05 MB

Reviews

This pdf might be well worth a study, and a lot better than other. It really is simplistic but excitement inside the fifty percent in the book. Its been printed in an exceedingly straightforward way which is just after i finished reading this ebook through which really modified me, modify the way i believe.

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | and using Film as an example | The purpose of this essay is to solve the hard applying problems caused by the closet scheduling theory. Although scheduling management is equally important in academic world and industries, the theory is too ideal to implement entirely. Plastics manufacturing was once a major industry of Taiwan, but the competence of it was declining deeply by higher and higher labor cost. To survive, some of the factories tried to cut costs by improving the efficiencies of production while others moved to the lower labor cost countries. Therefore, the proper scheduling is one method to help factories ameliorate the efficiencies. To alleviate the problem mentioned before, this study uses Film as the example, dividing scheduling issues into Job Shop, Single Machine, and Sequences Dependent, applying the concept of Group Technology, and eventually obtaining the best results of scheduling by experimental design. However, the mission of this study is to help industries minimize the makespan and cost ultimately. | Format: Paperback | Language/Sprache: english | 76 pp.
