

Optimization of Distributed Database Systems and Computer Networks (Classic Reprint) (Hardback)

By Jacob Akoka

FBC LTD, 2018. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Optimization of Distributed Database Systems and Computer Networks In previous works, most of the research focused on the problem of minimizing the operating cost of a distributed database. A great deal of attention has been devoted to the problem of Optimal distribution of the files over a network of computer systems. One of the earliest studies of the file allocation problem was done by Chu He developed a linear-programming model allocating files so that the allocation yields minimum overall operating costs subject to the following constraints: (i) the expected time to access each file is less than a given bound, (ii) the amount of storage needed at each computer does not exceed the available storage capacity. His model includes storage costs, queuing delays, and communication costs. But he assumed that the number of copies of each -file in the system is known. In a later paper, Chu(10) developed a procedure to determine in advance how many redundant copies of a file are required to achieve a desired level of reliability. Then, he inserted this number into the model, and the basic scheme...

Reviews

This publication is very gripping and intriguing. It is among the most awesome book we have go through. You can expect to like how the author compose this book.

-- Dr. Malika Bechtelar II

This ebook might be worthy of a read, and superior to other. It usually does not charge an excessive amount of. Once you begin to read the book, it is extremely difficult to leave it before concluding.
