Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Blends of Chemically Treated Cotton Fibers With Untreated Cotton Fibers to Improve Abrasion Resistance of Durable Press Garments While the application of resins to obtain wash-wear or easy-care properties in ap parel textile items has long been known to significantly lower their abrasion resist ance and strength, the problem was not too serious when chemical add-ons of only 3 to 4 percent were used. In the case of the deferred-cure resins, considerably higher chemical add-ons and higher curing temperatures have been used in the case of the conventional resins to speed production and to accomplish the curing of multiple layers of fabrics. The overall result of these changes has been that some permanent-press cotton apparel items were degraded to the point where significant abrasion damage resulted in fewer than 10 wash and tumble drying cycles. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
