Date :2009-07. topology Tutorial: topological space and distance space. the value function. topological vector space (2nd Edition) is the author of the 1960 book Analysis Tutorial The second volume. has been translated into English and Spanish. including topology and function space. Topology Tutorial: topological space and distance space. the value function. topological vector space (2nd edition) has some mathematical basis for the students. but almost does not require any prior knowledge. So that it can be as simple as possible in a framework of understanding on the powerful tool of modern analysis and its applications. G. Xiao cover for the French Academy of Sciences. not only in academic reputation in teaching is also highly distinctive. The basic concept of the book is almost down in their general form introduced by the selected examples to illustrate the definition of reasonable. For example. any topological space in the narrative. first a brief discussion of the real number line; and consistency from the space in question raised after the introduction; Similarly. normed vector space and Hilbert space can only be discussed after the introduction of locally convex spaces. which in modern analysis and its application in more and more important. Book through a lot of examples and counterexamples to illustrate the exact scope of the theorem. and set a variety of difficult exercises to facilitate students to test their understanding of the curriculum and exercise their ability to innovate.
