FORECASTING STOCK RETURNS USING A COPULA-GARCH MODEL

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Investigating dependence structures of stocks that are related to one another should be an important consideration in managing a stock portfolio, among other investment strategies. To capture various dependence features, we employ copula. Financial time series data is typically characterized by volatility clustering of returns that influences an estimate of a stock's future price. To deal with the volatility and dependence of stock returns, this book provides procedures of combining a copula...
