Technical bulletin Volume 1

By New Hampshire Station

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 24 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1901 Excerpt: . . . of the mountains are immersed in cloud, it will hesitate to fly again, trusting largely to its grey mottled appearance to escape the eye of its pursuer. But if its exact position was noted and its disguise penetrated it will even then frequently escape, slipping by means of a few judicious move ments, or often by simply feigning death and allowing its body to drop, amongst the loose stones that everywhere strew the ground. The single brood flies from late June until August, and is often plentiful in the limited area where it occurs. Distribution. Alpine region of Mount Washington. SPECIES OF DOUBTFUL OCCURRENCE. . Chionobas jutta Hiibner. An Arctic and circumpolar species, which finds the southernmost point in its range, so far as is known, in a bog near Bangor, Me. It is also found near Montreal, and probably in any suitable locality within the...
