Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. This book brings together information from widely dispersed and hard-to-find sources, summarizing recent medical and psychological research in laymen s terms. Sources include the Centers for Disease Control, medical professional groups, published medical research, media reports, plus LGBT medical and advocacy groups - all documented in 1,800 endnotes with up-to-date links. Topics include: - Why homosexuality is a public health issue, and not just a private issue - The politicized medical and mental health establishments - The born gay myth: homosexuality is not innate - How many identify as gay, lesbian, or bisexual - The mental health issues: depression, anxiety, suicidality, substance use, partner abuse, and BDSM (bondage/sexual sadomasochism) - The self-harming lifestyles and sexual practices of homosexual men and lesbians - The disproportionate disease incidence among gays, lesbians, and bisexuals - Why homosexuals have shortened lifespans, chronic conditions, lower quality of life - How HIV/AIDS is re-emerging as an epidemic among homosexual men - The safer sex lie and other mixed messages from the medical establishment - How the CDC is spreading false optimism on HIV drug treatments - Bisexuals have the highest incidence of pathologies...
