The positive rotation around a point, or, what comes to the same, the positive circulation around a closed curve, is always to be defined in accordance with the positive-screw rule. As we count the normal to these surfaces positive upward, the positive rotation around the normal will be a rotation against the motion of the hands of a Watch and the positive circulation will be the cyclonic circulation E. --N. --W. --S. of the northern hemisphere. (Compare the dial of fig. 32.) We shall agree to consider all given angles a, B, \dots which are used to represent the direction of given vectors as produced by positive rotation from the chosen initial direction. Thus all initially given angles will be represented...
