Role of Management The reason Path Service is able to provide such efficient communications services to handle telemetry data is that a supportive communications infrastructure is preconfigured by network management prior to transmission of any dam. This infrastruc-ture includes Logical Data Paths and Virtual Channels, along with specifications of pertinent attributes, such as maximum data rate and length of time an instrument will be turned on. The amount of overhead involved in this configuration process cannot be quantified at this time, because development of the management portion of the CCSDS recommendation has just begun. After management has configured the communications infrastructure to support each of the instrument...
