Capital Market and SEBI Regulations

By Tapash Ranjan Saha

Excel Books, 2009. Softcover. Book Condition: New. First edition. 18 x 24 cm. Capital Market is a part of a greater system known as Financial System. The financial system of a country aims at transferring the surplus money from one sector of the economy to the deficit sector of the same or different economy. Capital Market is an organised market dealing with financial assets which have a long or indefinite maturity period. In general, it consists of those assets which have a maturity period of more than one year. Indian Capital Market is a heterogeneous combination of Primary Market and Secondary Market. With the economic liberalization in 1991, the Indian financial system has undergone radical changes from 1992-93. The main reforms are done in the area of Commercial Banking, Capital Market, Non-Banking Finance Companies (NBFC), Insurance Companies, etc. The liberalization focused on the establishment of easy process of finance dealing, and therefore, to reduce the complicated legal formalities, Securities Exchange Board of India (SEBI) was set-up in 1992, followed by NSDL, NSE, CSDL, etc. This book provides a detailed analysis of the Indian Capital Market. It starts with elaborating the basic concepts of Capital Market and thoroughly discusses the SEBI...

Reviews

I actually started looking over this publication. It really is rally interesting through studying period. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Dana Hintz

Good electronic book and valuable one. It really is basic but unexpected situations in the 50 percent in the pdf. You wont really feel monotony at at any moment of your time (that's what catalogues are for concerning when you ask me).
