

Microarray Gene Expression Data Integration and Cancer Signatures

Filesize: 2 MB

Reviews

Extensive guideline! Its such a great go through. It is definitely basic but surprises in the 50 % of the pdf. It is extremely difficult to leave it before concluding, once you begin to read the book.

MICROARRAY GENE EXPRESSION DATA INTEGRATION AND CANCER SIGNATURES

[DOWNLOAD](#)

VDM Verlag. Paperback. Condition: New. 120 pages. Dimensions: 8.7in. x 5.9in. x 0.3in. Over the past decade, microarray gene expression data has been widely used to identify cancer gene signatures that could complement conventional histopathologic evaluation to increase the accuracy of cancer diagnosis and prognosis. However, due to the limited sample size of individual studies, there is often only a small overlap between signatures for specific cancers obtained in different studies. With the rapid accumulation of microarray data, it is of great interest to understand how to combine microarray data across studies of similar cancers in order to increase sample size, which could lead to the identification of more reliable gene signatures of specific cancers. This book provides a novel statistical method, based on the top-scoring pairs classifier family, for inter-study microarray data integration. By incorporating this new method into different statistical models, we can identify robust gene signatures for cancer diagnosis and prognosis from integrated microarray data. This book is primarily aimed at cancer researchers, especially in the emerging field of cancer bioinformatics, but should also be valuable to statisticians and medical researchers entering the field. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
