Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Jack Drozd thinks he s an ordinary boy-but how come he and his friends get involved in crazy adventures? Could it be because they love mystery and suspense, the excitement of chasing ideas and are filled with a desire to figure things out? But their adventures don t require travel to remote or dangerous places, or transformation into creatures with magical powers. All they have to do is. think like engineers. In each of these stories the kids encounter a problem, such as garbage in the middle of a pristine pond, a snowball fight or a flood that might damage their school. They don t need to be special geniuses to solve these difficulties, just willing to think. This process, however, isn t purely mental, it also engages all their emotions, anger, happiness, sadness, ecstasy, amazement and more. And even better, these stories also invite the reader to think about the method, find flaws in the presented solution or find a better answer.
