American Psychiatric Association Publishing, United States, 2015. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book. The Structured Clinical Interview for DSM-5 - Clinician Version (SCID-5-CV) guides the clinician step-by-step through the DSM-5 diagnostic process. Interview questions are provided conveniently along each corresponding DSM-5 criterion, which aids in rating each as either present or absent. The SCID-5-CV is an abridged and reformatted version of the Research Version of the SCID, the structured diagnostic interview most widely used by researchers for making DSM diagnoses for the past 30 years. A unique and valuable tool, the SCID-5-CV covers the DSM-5 diagnoses most commonly seen in clinical settings: depressive and bipolar disorders; schizophrenia spectrum and other psychotic disorders; substance use disorders; anxiety disorders (panic disorder, agoraphobia, social anxiety disorder, generalized anxiety disorder); obsessive-compulsive disorder; posttraumatic stress disorder; attention-deficit/hyperactivity disorder; and adjustment disorder. It also screens for 17 additional DSM-5 disorders. Versatile in function, the SCID-5-CV can be used in a variety of ways. For example, it can ensure that all of the major DSM-5 diagnoses are systematically evaluated in adults; characterize a study population in terms of current psychiatric diagnoses; and improve interviewing skills of students in the mental health professions, including psychiatry, psychology, psychiatric social work, and psychiatric nursing. Enhancing the reliability and validity of DSM-5 diagnostic assessments, the SCID-5-CV will serve as an indispensable interview guide.
