

British Plants: Their Biology and Ecology (Classic Reprint)

Filesize: 2.07 MB

Reviews

It is an awesome book that we have possibly go through. It is actually writter in straightforward words and phrases and not confusing. It is extremely difficult to leave it before concluding, once you begin to read the book.

BRITISH PLANTS: THEIR BIOLOGY AND ECOLOGY (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from British Plants: Their Biology and Ecology The object of the present volume is to fill a gap which appears to the authors to exist in the literature of elementary botany, and, however imperfectly this object has been attained, it is their hope that a sufficiently clear indication has been given to teachers and students alike of the lines upon which the interaction between the vital element on the one hand and the forces of Nature on the other may be read into the hard facts of morphology, and thus the dry bones of descriptive botany be clothed with living flesh. The association of form with function, of fact with environment, and of effect with cause, provides undeniably the most efficient method of securing a real knowledge of any branch of Natural History, the study of which by this means becomes one of the highest educational value. Botany is the most accessible of the Natural Sciences. Flowers are everywhere. They appeal to the wonder of the child, and for older folk their study and cultivation form an unrivalled hobby. To many, however, botany appears a science of hard names and still harder facts - at least at the outset. The knowledge derived from the text-book is too often overburdened with detail and is therefore soon forgotten. Too much of it is concerned with the bodies, and too little with the lives, of the plants so minutely described. This should not be. There is romance and tragedy in the struggle of vegetable forms and races as among animal. Plants as well as animals constitute an aggregate of living things, the component races of which compete for mastery...
