Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Clinical Treatises on the Pathology and Therapy, of Disorders of Metabolism and Nutrition, Vol. 8: Gout The amount of literature that has been amassed in the last decade on the subject of gout presents a severe task to the clinician who desires to make him self familiar with the metabolism of this disease. On this account a monograph which attempts to separate the more important results of research from the less, in the relation to clinical medicine will be of an especial aid to the practitioner, and will serve also as an introduction to the present trend of Opinion in these disorders. Professor Strauss is unusually qualified to write such a monograph, since as a physician he is thoroughly conversant with the clinical difficulties that surround gout, and, moreover, as an investigator he is able to weigh and value accurately the results of experiments. This is especially notable in Professor Strauss handling of the subject of uricacidemia in its relation to the deposition of crystalline salts. In considering the therapeutics of gout, special stress is placed on the individual demands of the case rather than a general scheme of conducting all cases, and here also this point of view is broad and conservative.
