And he s been hired to kill her. Nice. The Wolf Queen must die, apparently, since she s a rogue AI that could bring down two powerful corporations that are in the middle of a titanic merger. Because life is never easy for a guy with an archaeology degree. So Vince is back for one last ride, along with his crew of hardened NPC adventurers, including a salty sailor with a gift for guns, an African prince who has a fortune to spend, and a beautiful reporter on an idealistic crusade. Together they are lost in a world created by the fevered mind of genius game designer Hans Konkin, and Vince will soon discover that he isn t the only player in this deadly game, one that could determine the fate of all humanity. No pressure. *Based on old school MUDs and text adventures - consider this retro litRPG.
