MEMORANDA ON THE STRENGTH OF MATERIALS USED IN ENGINEERING CONSTRUCTION (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Memoranda on the Strength of Materials Used in Engineering Construction Many valuable accessions to our knowledge of the strength of materials have been made within a comparatively recent period; the records, however, have been scattered through different books, periodicals, c. not always accessible or convenient for reference. We have therefore endeavored in this brief essay to bring together and arrange some of the more important elements, both old and new, so as to form an aide memoire for the Engineer and Architect, at the drawing office and elsewhere. The sources of information have been given as far as possible, in order that the results may be checked, and opportunities afforded for lengthened investigations, which are beyond the scope of these papers. Wherever it has been necessary to express the strength of any material in tons, we have modified the tables and formulas to admit the use of the American ton of 2,000 lbs. as promotive of simplicity. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
