CD-Audio. Book Condition: New. Not Signed; Description: When still a young man attending university, L. Ron Hubbard observed that those working in the humanities had no training in the exact sciences. Believing that the precision of the scientific method might furnish a solution to the problems of life and livingness, he urged faculty members of the psychology department to apply the principles of physics to the field of the mind. It was an entirely novel approach. And when no one took up the challenge-either then or in later years-Ron undertook the task himself. Unlocking a wealth of answers about human beings and their potentials, he did indeed resolve the long-standing riddle of the mind. With the discovery of its exact nature then came breakthrough after breakthrough, culminating in the first technology providing the means to greatly increased ability. Here, then, is the remarkable account of how L. Ron Hubbard bridged the gulf between two disciplines that occupied entirely separate worlds. In consequence, millions today are more happy, successful and able. For this is the adventure of Scientology. book.
