By Graeme J. Tupper, Harpal S. Mavi

Taylor Francis Ltd, United Kingdom, 2008. Hardback. Book Condition: New. 213 x 150 mm.

Language: English . Brand New Book. Learn how the climate can affect crop production!

Agrometeorology: Principles and Applications of Climate Studies in Agriculture is a much-needed

reference resource on the practice of merging the science of meteorology with the service of

agriculture. Written in a concise, straightforward style, the book presents examples of clinical

applications (methods, techniques, models, and services) in varying climates and agricultural

systems, documenting up-to-date research literature from around the world. Its systematic

approach--different from most books on the subject--makes it an essential tool for teaching,

planning, and practical use by working farmers, as it examines topics such as solar radiation,

effective rain, drought monitoring, evapotranspiration, and remote sensing. Agrometeorology:

Principles and Applications of Climate Studies in Agriculture examines the developing discipline

that international agencies such as the World Meteorological Organization (WMO) and the Food and

Agriculture Organization (FAO) have declared to be an important growth area in university

education. A panel of academics, researchers, and practitioners explore the role of

agrometeorology in optimum crop growth, from the interactions between meteorological and

hydrological factors and agriculture, including horticulture, animal husbandry, and forestry. The...
