Paperback Pages Number: 261 Language: Simplified Chinese Publisher: People's Health Publishing House; 6th edition (January 1, 2004). The content of the National College Textbook of Medical Biology Introduction: In recent years, with the cell biology with the rapid development of genetics, many medical schools to establish independent cell biology, Medical Genetics, ecology and experimental kinematics courses. These courses can not replace the traditional Medical Biology, on the one hand, it is because they are different aspects of the relations and the application of modern biological science and medicine, and can cover all the contents of the Medical Biology; medical students need to master the knowledge of the biological macro. Medical Biology is a systematic introduction to the biological basis of theory, basic knowledge and the progress of modern biology and medicine, from the macro-embracing training, to cultivate students' comprehensive ability to lay the foundation to learn medical science. 6th edition textbook is divided into 16 chapters Chapter 1 introduces the general principles of the life course, 6 to 9 describes the biological diversity and its relationship to the environment....
