Biblioscholar, United States, 2012. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.In 1991, Operations DESERT SHIELD and DESERT STORM marked a milestone in joint and coalition operations. However, it also highlighted interoperability issues, which subsequently drove joint doctrine, tactics, and concepts of operations. Today, the Department of Defense s (DOD) transformation is hurtling the services past interoperability towards joint interdependence, but they are not there yet. Capability seams and gaps create sub-optimal efficiency and compel the services to pursue organic capability that when aggregated, results in an overly redundant structure.<sup>2</sup> This mindset has driven a service-centric approach to bare base capability and resulted in capability overlap and logistics inefficiency. Considering the fiscal struggle to transform and re-capitalize military forces, it is imperative that the DOD find operational efficiency from the simplest to the most sophisticated weapon system. While not glamorous, bare base capability is a critical enabler to expeditionary operations, which in turn, is critical to United States National Security and Defense Strategies. Therefore, in the context of a joint operational environment, the services goal should be to present a combatant commander with effective bare base capability at the least cost.
