Springer. Paperback. Condition: New. 274 pages. Dimensions: 9.2in. x 6.1in. x 0.7in. The paper highlights how the interaction of domestic informational frictions, perfect capital mobility, and foreign interest rates can combine to provoke a sudden depreciation of the exchange rate and a prolonged decline in output. In particular, the authors describe conditions under which two different equilibria exist. One has a high level of output and a minor costly-state-verification problem, and the other equilibrium has a higher level of output and a severe costly-state-verification problem. In addition, the authors show how their model can successfully simulate a crisis path that is qualitatively consistent with occurrence such as the Mexican financial crisis in 1994. An important lesson emerging from this work is that even a small change in external factors can generate a crisis path, when this initial shock hits a small open monetary economy, if the economy features a combination of domestic informational frictions with international capital flows. The next paper, by Hernandez-Verme, also focuses on the study of small open economies within the context of an overlapping generations model. Unlike Antinori and Huybens, however, her main concern is the relative merits of different methods for achieving price stability. To do so she merges the overlapping generations model with a spatial model of Townsend to compare the merits of alternative exchange rate regimes namely, fixed and flexible. This analysis is carried out within a context where financial intermediaries perform a real allocative function, there are multiple reserve requirements, and the economy is subject to credit market frictions. She finds there is scope for endogenous volatility, independent of the exchange rate regime in place. Another key finding is that under floating exchange rates, a positive trade-off between domestic inflation and output can be exploited under credit rationing but only if inflation is small. In fact, there exists an inflation threshold beyond which domestic output suffers. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
