Not illustrated. 1881 Excerpt: .about two hours, the comet of 1843, like that of 1680, went round the sun, from one side to the other. What could have become of the tail, which was reaching out about a hundred millions of miles from the sun as far as to the earth s orbit? There have been those who have actually adopted the incredible-- I may say the impossible--hypothesis that the tail rotated through this immense circuit, developing a centrifugal force which all the united powers of the universe could not have sustained. But, no! The comet practically left its tail behind it, and began to grow a new tail as it receded from the sun. There were thus two tails, nearly side by side, stretching from opposite sides of the sun in nearly the same direction. The new tail began at the head of the comet; whereas the old deserted tail...
