paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 198 Publisher: Electronic Industry Pub. Date :2011-6-1. Automatic control principle is the engineering expertise of a major technology-based courses. to learn and master control theory and automation technology based courses. This book presents classical control theory and the basics of modern control theory. mathematical modeling. including control systems. transform and solving the system of concepts and criteria of stability. steady-state error and control system dynamic performance analysis and calculation method of root locus analysis . the logarithmic frequency characteristics analysis. classical control theory. system design. system controllability and observability. state feedback and state observer. z and z transform inverse transform. the computer control system analysis and design. Appendix of this book also describes several matlab control system simulation software package to use. you can book examples and exercises in the computer simulation of the system. Contents: Contents Chapter 1 Introduction 1.1 The basic concept of the control system open-loop control system 1.1.2 1.1.1 closed-loop control system. control system engineering applications 1.2 1.2.1 1.2.2 hard disk temperature control system in the head position control system 1.2. 3 thermal power plant electricity production of integrated control system control theory 1.3 1.4 a brief review of the development of control systems analysis and design Summary Exercises Chapter 2. a mathematical model of control system Four Satisfaction guaranteed, or money back.
