ELECTRONIC NOSES AND OLFACTION: PROCEEDINGS OF THE 7TH INTERNATIONAL SYMPOSIUM ON OLFACTION AND ELECTRONIC NOSES, BRIGHTON, UK, JULY 2000 (HARDBACK)**DOWNLOAD**

Taylor Francis Ltd, United Kingdom, 2001. Hardback. Condition: New. 2000 ed.. Language: English . Brand New Book ***** Print on Demand *****. Electronic Noses and Olfaction 2000 reflects the state of progress toward the development and application of electronic instruments called electronic noses (e-noses). These instruments are generally based on arrays of sensors for volatile chemicals with broadly tuned selectivity, coupled to appropriate pattern recognition systems. They are capable of detecting and discriminating a number of different simple and complex odors, such as the headspace of coffee and olive oil, as well as being able to perform simple multicomponent gas analysis. Written by international scientists, engineers, technologists, clinicians, investigators, and instrument manufacturers working in the applied research of e-noses as well as in the applications of olfaction and taste, this volume is essential reading for anyone who wants a review of the latest developments in odor sensors, instrumentation and signal processing, and their medical, agricultural, and food-related applications.
