American Psychiatric Association Publishing, United States, 2005. Paperback. Condition: New. 2nd Revised edition. Language: English . Brand New Book. Combining years of research, teaching, and experience treating trauma survivors, Dr. Jon G. Allen offers compassionate and practical guidance to understanding trauma and its effects on the self and relationships. Coping With Trauma is based on more than a decade of Dr. Allen's experience conducting educational groups for persons struggling with psychiatric disorders stemming from trauma. Written for a general audience, this book does not require a background in psychology. Readers will gain essential knowledge to embark on the process of healing from the complex wounds of trauma, along with a guide to current treatment approaches. In this supportive and informative work, readers will be introduced to and encouraged in the process of healing by an author who is both witness and guide. This clearly written, insightful book not only teaches clinicians about trauma but also, equally important, teaches clinicians how to educate their patients about trauma. Reshaped by recent developments in attachment theory, including the importance of cumulative stress over a lifetime, this compelling work retains the author's initial focus on attachment as he looks at trauma from two perspectives. From the psychological perspective, the author discusses the impact of trauma on emotion, memory, the self, and relationships, incorporating research from neuroscience to argue that trauma is a physical illness. From the psychiatric perspective, the author discusses various trauma-related disorders and symptoms: depression, posttraumatic stress disorder, and dissociative disorders, along with a range of self-destructive behaviors to which trauma can make a contribution. Important updates include substantive and practical information on Æ Emotion and emotion regulation, prompted by extensive contemporary research on emotion -- which is becoming a science unto itself. Æ Illness, based on current developments in the neurobiological understanding of...
